Comments: I am fully in favor of adding trail connectivity on Narrowback Mountain. I would like to see more relocation of "legacy" trails and or new trail construction along the Tillman Road Corridor. The North River district needs more trail connectivity and this project will help it greatly. Narrowback Mountain was one of my first mountain bike rides in college, and I'm now very involved in the community and sit on the board of my local mountain bike trail organization, Blue Ridge Off-Road Cyclists. More beginner and closer trails means more access for all types of users. In this time of COVID-19 many people's only refuge from stress is getting outside on the trails. In addition, mountain biking is becoming the number one way for regions to attract tourism and the new influx of remote workers.
