Title:

Comments: One of the main reasons I chose to build my company and raise my family in the Shenandoah Valley was the access to the National Forest. The hundreds of thousands of acres provide a natural playground for hiking, cycling and camping. Continuing to build professionally built, sustainable trails in the forest add to this opportunity. The trail proposed on Narrowback will be one of the closest trails to Harrisonburg and will be less technically demanding than most allowing many more people to enjoy it. I hope the trail is approved and construction can start immediately.

Sincerely,

Ken
