Comments: Ochocos

I do NOT understand the meaning of the 21" rule as to how it affects the future of the forest. It is my belief that this action is being proposed to cater to mill industries who would benefit from the harvesting of these beautiful trees that have taken so long to grow into the magnificent structures that they are. This proposed act is unconscionable! We camp in this forest regularly and admire the sanctity of the landscape of the trees as do other numerous forms of wildlife. Do NOT cut down these magnificent trees! They are of more value where they stand and exist now than in some mill where they will be processed into junk mail and other insignificant products.
