Comments: Eastside Screens Plan Amendment, Holistic Revision please

To Whom This May Concern,

Please consider the environmental impact from more than one research source. I am a supporter of President Trump and I would love for this project to be an example of environmental concern and prudent progress. Please show Oregon can be held accountable for the remiss handling of this issue. I would love for this opportunity to show we have a smart and caring administration.

I hope to see a great outcome from this time in Oregon's history. Please protect the riparian areas and protect the original goals of the interim ruling. I am very concerned about native species and the existing ecological balance in the affected areas. I would love to see before and after coverage to reassure the environmentally concerned citizens, such as myself, especially in regard to the roads and potential bulldozing.

Thank you for your time and concern. Regards,

Kate McIntosh
