Comments: trees

Dear Friends,

We live in the Black Hills of South Dakota where our trees are beautiful as well as plentiful. However, fires, insect infestations and other predators continue to, and always will take their toll.

A recent trip through the northern part of Yellowstone left us amazed at the forest devastation.

Please do not be predators to the trees in Oregon any more than you have in the past. Of course, becoming less aggressive in that matter, and more aggressive in preservation and fire prevention would be much more NOBLE.

Thanks and blessings,

Loren and Wendy Cooper
