Comments: Eastside Screens

Hello:

I wish to voice my opposition to revising the 21-inch limitation of the Eastside Screens. With some knowledge on the topic, I fail to see how allowing removal of larger trees would increase a forest's resilience to wildfire.

The only benefit I see would be the value of the timber involved. The forests' long-term health should be the only concern here; I hope as forest managers you agree.

Sincerely,

Les Adams
