First name: Savannah

Last name: Hawkins

Organization:

Title:

Comments: Immediate action is needed to list the bison for conservation concern. It is our national animal and humans have learned a lot from them on how to get along in a community.

Standards are very important to be included in the Custer Gallatin plan for the bison which need to be protected as they are much more useful than cows to the ecology of our environment.

In addition, they are a dignified and proud animal that needs to be respected.
