Title:

Comments: Good evening,

The Stibnite Gold Project has my full support and I hope that it continues to move forward into production. My families livelihood is farming so I'm a conservationist at heart, we have to manage and harvest our resources while protecting our environment in order for our future generations to survive and prosper as we have. This project has taken in to consideration all aspects of the environmental impacts and will be an overall improvement to the Salmon River drainages and help restore the ecosystem.

Furthermore on a national level, this mine allows our country be more self sufficient without relying on other countries to provide the raw materials that help us advance technologically and ensure our security. Lastly the project would provide good paying jobs and benefits for numerous citizens as well as economic benefit to numerous businesses and communities in the surrounding areas, not to mention the benefits to the manufacturer's that use the product nationwide.

Thank you for your consideration and I hope that this project continues to move toward production because of the positive environmental impacts, it helps us become less dependent on other countries and the economic benefits it would produce.

Sincerely,

Philip
