Comments: I fully support the Midas Gold Stibnite project, alternative 2. It is hard to imagine another project in the USA coming even close to the benefits this project will bestow upon Idaho and our country. Clean up a toxic site, create good paying jobs, contribute significantly to the area and state tax base, repair the fisheries, reforest the land, and build an enclosed processing facility to produce minerals for our technology companies and our nation's defense. All without using any taxpayer dollars. Thanks for the opportunity to comment and please approve this tremendously beneficial project.
