Comments: I support this project and want to express the need for this trail, which will provide great connectivity from an existing parking lot, rather than the old trail (Dog Graveyard) up to the ridge, which doesn't connect to anything. It's important for more trail mileage to be create in the National Forest, and for better, more practical connections like this one to be made. So please consider this as outdoor recreation, particular on trails, is bigger and more important than ever. It benefits all of us to build more trails like this. Thank you for your time.
