Comments: Custer Galatin Forest Plan Revision #50185

Objections

CowboyHeaven is not planned as Wilderness. Please assign as Wilderness. This has substantial public support.

CrazyMountains plan. The current planned Wilderness does not extend far enough to the east. Please extend the plan for Wilderness further to the east. This will be good for the Absaalooke Indians, from whom the land came, and would also bless the rest of us.

Chalk Buttes plan. The planned BCA designation does not adequately protect the existing primitive recreation and wildlife. Mountain biking should not be considered because of the desired primitive condition, and because of the terrain.

Pryor Mountains plan. The plan does not include Big Pryor and Punch Bowl in Wilderness. These areas should be included for continuity and completeness. This would be another gesture of good will to the original people, the Absaalooke people.

Lionhead plan. The Lionhead needs to be left as Wilderness. This would provide continuity with Targhee Cr. In Idaho, both for man and wild animals.

Hyalite Canyon plan. Protection needs to be extended, strengthened for South Cottonwood and Mt. Blackmore from development.
