Title:

Comments: Just say no to the proposed Midas Gold Idaho, LLC mining project in and around Stibnite, Idaho because it will permanently destroy thousands of acres of wilderness that will never be repaired again in our lifetimes or the lifetimes of our children, grandchildren or great grandchildren.

The amount of destruction and pollution of land and water that would certainly result from this proposal could never balance out against the meager amounts of gold and other metals the corporation might pull out of this area, metals that would be swallowed up by our economy and disappear from view in minutes while a portion of our Earth is destroyed nearly forever.

Please reject this shortsighted, greedy proposal to destroy a portion of Idaho in exchange for a relatively small amount of metals, and leave this land and the ecosystem in which it is located and further affects beyond its boundaries alone for humans, animals and the health of our lands and waters themselves.
