Comments: As a member of the Buffalo Field Campaign-along with other Animal Rights & Environmental groups-I urge YOU to finally LISTEN to THE PEOPLE who have been fighting for the Buffalo to designate them as a Species of Conservation Concern!

I, among thousands of others have been protesting, signing petitions, making calls urging for the END of hazing of Buffalo, trapping and shipping of Buffalo within Yellowstone and other areas.

NO Buffalo should be harassed and prevented from following their centuries old instincts of migration throughout and around Yellowstone.

I have been appalled by the treatment and abuses inflicted upon what the PEOPLE have designated as OUR National Mammal!!

We have done enough damage to our environment, the animals that we share this planet with. I believe that COVID and certainly Climate Change are Warnings that we MUST interact, treat the Natural World differently! PLEASE Designate the Bison as a Species of Conservation Concern.

Allow them to roam their migratory routes they have have centuries now and TREAT THEM LIKE ELK!!! LEAVE them ALONE-NO Hazing, Trapping or shipping to Slaughter!

Ranchers MUST REMOVE their EVASIVE cattle!!!! ENOUGH!!!

Millions go to Yellowstone and the West to SEE the Wildlife-Bison, Wolves and other animals draw visitors, help the economy-they also help our ecosystems, keep them in balance and in a healthy state!

LEAVE THEM ALONE!!! PEOPLE ARE TIRED OF THE ABUSES, DESTRUCTION of OUR Wildlife, Wild places!

We WILL VOTE IN NOVEMBER for PEOPLE WHO CARE ABOUT the EARTH we need to survive and the animals that keep it balanced and healthy!!
