Comments: Please modify the Shasta Agness Project

Dear Shasta Agness Objections,

I am shocked by your draft decision to log 2,199 acres of Late Successional/Old Growth Reserve Lands (LSR) under the guise of "oak restoration." I love the old growth forests in Oregon and I love the wildlife which lives in them. I moved to Oregon 23 years ago because of it's natural diversity. I experience great joy in wondering through the woods and sharing the natural environment with the many birds and animals living there. I understand we need lumber to build all the homes we live in, but please don't disturb the old growth forests and the beauty of our natural world. Certainly in this technological world we live in there are ways to get the lumber we need without ever clearcutting anything again. It leaves such unsightly scars on our beautiful land.

Thank you for incorporating my concerns into your project planning effort.

Sincerely,

Ms. Elizabeth Snyder
