Comments: Protect habitat and list American bison as a species of conservation concern.

Dear Supervisor Erickson,

You must include habitat standards in the Custer Gallatin land management plan for American bison to freely roam our National Forests in the Yellowstone ecosystem.

You must also designate American bison a species of conservation concern to ensure a viable future for the migratory giants on our National Forests.

The distinct and unique American bison herds remaining in the wild deserve standards and legal designations securing their presence on our National Forests for future generations. They are America's Icons!!!!

Sincerely,

Louise Gray
