Comments: I respectfully submit my personal comments concerning the Stibnite Gold Project. I support this project and whole heartedly believe the resulting environmental outcome will be greatly improved. The local geology and historic mining activities have created an environmental problem that can be repaired. The years of study and regulatory review reveal Alternative 2 should be considered a great plan going forward.

The Stibnite Gold Project vwill be done in a responsible manner, will restore the environment, provide tremendous economic gains with jobs, taxes and local commerce.
