Comments: There must be one place left in the world for American bison to roam wild and free and adapt as a wildlife species. This is the legacy the distinct and unique American bison in Yellowstone carry. We must do more for them.

Please join us in doing more for them by demanding standards in the Custer Gallatin National Forest land management plan. Habitat must be secured for American bison to freely roam our National Forests. When is this nonsense going to end where the buffalo are persecuted for being buffalo???? All politics and I want to see the buffalo roam FREE in the United States.....
