Comments: Just wanted to let the powers that be know this is a positive step to the facts that this will be helping our forests, bring clean air back to an area that was forgotten.

It seems to me that any improvement made to water, wildlife, employment, recreation, is a great thing. Helping the economy in times like these is positive

for our country. I for one ask you to sign off on the project it will have far reaching affect for years to come.

Respectfully given...
