Organization:

Title:

Comments: I would like to thank the Forest Service for all of the work that has gone into the Forest Plan. I was especially excited to see that the Forest Plan includes the following:

Recommended wilderness in the Crazy Mountains and recognition of the area as important to the Crow Tribe. Expansion of recommended wilderness in Lost Water Canyon and the addition of Bear Canyon in the Pryor Mountains. Maintaining the primitive character and management of the roadless areas in the Ashland Ranger District (Tongue River Breaks, King Mountain, and Cook Mountain). Ensuring recommended wilderness will be managed without non-conforming uses. Incorporating many elements of the Gallatin Forest Partnership, including recommended wilderness for the Gallatin Range..

Statement of issues and/or parts of the plan revision to which the objection applies:

My objections apply to the following issues in the Custer Gallatin Land Management Plan:

Cowboy Heaven (MG-CHBCA)

Crazy Mountains Backcountry Area (BC-CMBCA)

South Crazy Mountain Recommended Wilderness

Chalk Buttes Backcountry Area (SX-CBBCA)

Pryor Mountains BCAs

Elimination of recommended Wilderness, including Lionhead

Hyalite area (MG-HREA)

Concise statements explaining the objection and suggestions on how the proposed plan should be improved:

Cowboy Heaven (MG-CHBCA):

I strongly object to Cowboy Heaven not being recommended for Wilderness. It makes sense to have designated Wilderness that is connecting two areas of Wilderness and recommended wilderness. It makes a natural corridor for wildlife and better breeding possibilities. Please incorporate this important element of the Gallatin Forest Partnership Agreement by recommending Cowboy Heaven for wilderness in the final plan.

Crazy Mountains:

The Crazies are perhaps the most striking mountain range in MT. For the sake of Native and non-native Americans, it makes sense to preserve this spectacular mountain range. The proposed Backcountry Area should be modified to prohibit mechanized use. There are no existing mountain bike trails in this area and leaving the door open for the trails to become designated down the road only invites conflict where there doesn't need to be any. Making new trails doesn't make sense. Mountain bikers (and I am one) have plenty of "epic" trails throughout MT. Foot and horse recreation are historic here and should be the priority. Combining the two could be very unsafe. Mountain bikes can be pretty fast and going around corners is dangerous. I feel very strongly that the area should include a suitability component similar to the Bad Canyon backcountry area: The backcountry area is not suitable for mechanized transport, except use of game carts.

I would also like to see the Crazies BCA expanded east to include sections 4, 22, 26, and 34. If the proposed East Crazy Mountains land swap goes through, this will be a contiguous area and should be managed consistently with the adjacent backcountry area.

I was extremely pleased to see the Crazies receive some recommended wilderness protection. While I wish it was much bigger, I understand that there are many interests Supervisor Erickson is balancing. However, I ask that the South Crazy Mountains recommended wilderness be expanded east. That would help to make a larger contiguous recommended wilderness area.

Chalk Buttes:

The Chalk Buttes are another important place where I would like to see improved language in the backcountry area plan components. If it's dangerous for mountain biking, it shouldn't be designated as such or otherwise reconstructed for it. Similar to the Crazy Mountains, there are no existing designated mountain bike trails here. The Backcountry area should include the following suitability component in order to protect the current wild character of the area: The backcountry area is not suitable for mechanized transport, except use of game carts.

Pryor Mountains:

While I appreciate that recommended wilderness was expanded in Alternative F, I would like to see Punch Bowl and Big Pryor also recommended for wilderness. We've tried to get wilderness designation in the Pryors for years. It's time! For these reasons, I request that the Big Pryor and Punch Bowl areas be recommended for wilderness in the final plan.

Elimination of recommended Wilderness:

I was extremely disappointed that the Forest Service decided to eliminate 26,135 acres that had been previously recommended in the 1986 and 1987 plans respectively. I am particularly disappointed to see that the Lionhead

recommended wilderness has been eliminated. Why was it recommended in the first place? Go back and find out and that gives you the reasons it should be RW now.. Please consider reincorporating the Lionhead, Burnt Mountain, Republic, Mystic, and Line Creek Plateau as recommended wilderness in the new plan. It is important that we continue to protect these areas as recommended wilderness because the wilderness character has not changed there since they were recommended in the old plans.

Hyalite:

I encourage the Forest Service to fully implement the Gallatin Forest Partnership agreement, including key elements of the agreement that would protect Hyalite. Currently the plan doesn't offer any protection for the South Cottonwood Area or Mount Blackmore. Logging and road building take the primitive character away from a place for decades, even if reconstruction is attempted after the logging. The erosion that accompanies the logging lasts for years. Some places just deserve to be left alone. Nothing wrong with nature taking its course. It is important that these areas receive protection as the Gallatin Forest Partnership recommends.

In addition, I would like to see the Hyalite Recreation Emphasis area include the standard that was in Alternative C in the DEIS: Construction of new motorized trails shall not be allowed. It is very important that we ensure that the motorized footprint does not continue to expand because of the impact it has on the opportunity for high quality recreation for other users. There is plenty of motorized opportunity in Hyalite as is. Please include this important standard to ensure that Hyalite continues to be a place where users of all types can have high quality recreation experiences.

Please realize that protecting our forests, watersheds and mountains is the right thing to do. It is the gift we should be giving to future generations.

Thanks for taking these comments seriously.

Statement demonstrating the link between objection and prior formal comments:

I submitted a comment on the draft plan and draft EIS last spring. While I appreciate that many things I supported are included in the final plan, my objections speak to those priorities from my prior comments that were not included. Thank you for considering these objections that I believe could significantly improve the final plan.
