Title:

Comments: I was born and raised in Juneau Alaska, Tlingit and haida tribe. Eagle/ Killer whale family. I can tell you we do not need more roads or more trees being cut down. California is literally on fire and you guys wanna cut down more trees, on top of that, trees that are older are more important to the environment. And this area is home to the wolves and deer that have been there long before your family. Btw, the wolves were just petitioned to be added to the endangered species list. There shouldn't be any logging of any of Tongass' trees. Come on people the world is literally on fire. Oh wait that doesn't matter, money does. We don't need anymore roads there either. Leave the trees alone. It's like Rome is on fire and the government is playing the flute dancing while we burn. Nobody cares anymore. Please cancel this idea to demolish five thousand acres.
