Comments: It is absolutely appalling that the Forest Service continues to offer timber sales, at the expense of the planet, the people and all the beings that live there!! Shame on them and shame on all who seek to destroy such an important ecosystem! Knowing full well that it will cost far more in tax payers dollars and damage to our environment and planet at such a critical time. I pray for the protection and preservation of this Beautiful rainforest. Thank you to all of you that fight so hard to protect what precious nature we have left!
