Comments: I unequivocally oppose any timber sales in the Tongass. These resources will be urgently needed for future generations. Clear cutting timber is a crime, only 1/3 of any forest should be cut every 100 years. Lighter than air vehicles should be used to retrieve trees, surface transportation outlawed. Areas supporting endangered species should be forbidden to any human interference, logging and hunting or trapping firstly. Think of the people to come in the centuries ahead, What will they say about us if we have destroyed everything for the sake of sheer profit? Be a patriot, not the tool of rapacious profiteers!
