Comments: To whom it may concern,

I am writing in extreme opposition for ANY plans for any type of clear cutting of our great national forests. Clearcutting harms 26% of Alaskans economy from tourism and fishing to satisfy logging which supports 1% of the Alaskan economy which doesn't make any sense. My family and I are from Polk County Oregon timber country we've seen our communities suffer when big timber companies come in and rape the land without helping the tax base of the community thanks to lobbying interests they are struggling. Also I oppose logging of old growth forests due to the dire effects of climate change which trees especially old growth trees help mitigate.

Thank you for your time please do your part to help Mother Earth and the future of our next generation and oppose this plan.
