Title:

Comments: The virtual open house was inadequate and violation of the NEPA process. The public was not able to submit comments in a productive, collaborative forum and it was controlled by a moderator / censored. It additionally required specialized software and a high technical acumen to access.

Per the NEPA process "Public Open Houses are held during scoping period, (the opportunity for the public to be informed of the proposal, ask questions and submit comments"

The public is actively being censored; and this process needs more adequate oversight to ensure the rule of law is not violated.
