Title:

Comments: It is sad and very emotional that we are slowly killing this beautiful planet we already are losing forests all over the world to cut down a beautiful and wise old forest would be murder not just for the trees but for all the animals that call that forest home. Please speak out against this murder Mother Nature does not deserve this and neither do the beautiful creatures living within. This needs to stop we need to realize that Mother Nature is most important not the money that corrupts. Please save this beautiful wise forest.
