Comments: Years from now, our heirs will ask us what happened to beautiful, historic, irreplaceable places, such as Tongass. If you allow this place, and others, to be destroyed, what will we tell those children? Will we say We didn't think they were all that special? We have enough pretty places to be able to lose Just one or 2 places? People thought it was more important to make money with logging this place than to save it? If you destroy this place, it will be a travesty for the whole world, and you will be responsible for it! Wow! What a LEGACY to leave! Please use your heart and vote against destroying this place! The angels will rejoice in heaven and the animals will rejoice on earth!

Thank you! Thank you! P.s: come to Arkansas! We have many trees you can use! It is a great cash crop for us and is responsibly harvested and replaced!
