Comments: "The Tongass is the largest intact temperate rainforest left on Earth and provides vital habitat for eagles, bears, wolves, salmon and countless other species. It is a globally recognized carbon sink and helps to mitigate the worst impacts of climate change, storing approximately 8% of the total carbon stored in all national forests."

Yes this is copied, but it speaks volumes.

I am asking that you deny this permit to log this last great forest. At this time, the move to log seems incredibly politically motivated which is not the best reason to destroy this gem.
