Comments: I am alarmed and appalled that the Forest Service would slip an OHV trail into very sensitive terrain under the title of Southern HD Restoration Project. If OHV's were allowed to skirt around the forest boundary from Saul's Creek to Spring Creek-it would open access to motorized vehicles up Long Canyon, Trail Canyon, and Armstrong Canyon which are all sensitive areas and are part of the roadless areas. Of course the official trail would not include trails up Long, Trail and Armstrong, but there are old roads, and cattle trails that would allow access. It seems like a betrayal that with everyone dealing with so much....Covid, California Fires-the forest service would release such a destructive project idea under the heading of Restoration.
