Title:

Comments: DON"T!!!!

We need the wild, animals need the wild, future generations need the wild. We need the carbon sink the forest provides and the peace of mind knowing there is a small piece of a beautiful land still in tact. There are so many things the last few generations have done to destroy and monetize the environment around us. Let our children and grandchildren see we have the will and knowledge to do the right thing by continuing to protecting the Tongass (and roadless rule) for generations to come.
