Title:

Comments: Please do not let this pristine old growth forest be sold. Please restore my faith in your agency, and your decency as human beings, because once these great trees are gone, they're gone forever. And we'll be seeing photos of them in museums instead of knowing that they are being preserved for the greater good. Please have a change of heart. These trees provide so much more than money. They are valuable to the earth, to Alaska, and to human health and prosperity. Thank you.
