Comments: I am greatly disturbed and disheartened to hear that this project is once again being considered. How much more damage to our fragile ecosystem will be done to make money for a select few?

We already have a fire season that is growing in length and in danger, and threatens life in the mountains as well as the air quality and safety of those who live in them and near them including wildlife. Why would we want to make our forests even more vulnerable with even more destructive human activity?

<https://indianexpress.com/article/world/worlds-wildlife-population-down-by-68-since-1970-6589791/#:~:text=The%20WWF's%20Living%20Planet%20Report,population%20between%201970%20and%202016.>

Commercializing the mountains even further will do little to bring more tourists here. In fact, it will decrease their number because it is New Mexico's beauty that really brings them here.

Do not compromise our environment even further with this dangerous as well as obnoxious project.

Thank you for your time and attention,  
Mera Wolf
