Comments: Please save the South Fork Salmon from gold mining development. This short term use has a cost to the environment and tourism. Mining operations are never the same afterwards and leave much destruction in their wake for the taxpayer to nominally sweep up. I have paddled the SF Salmon every year for the past 3 years, I live in Oregon and spend money on shuttles, food, gas and lodging when I drive over to recreate on this river. Please save this river for me, my fellow recreators and future generations.
