Title:

Comments: As a Fawnskin resident, I've been increasingly alarmed over the past 4 years as fire seasons have become more intense. My family and I are working on creating defensible space around our home every weekend, but we know that it's not enough to protect us. We wholly support this plan and applaud the Forest Service for proposing it. So do our neighbors. Please push this through for the protection of our natural spaces and the safety of our mountain communities. Thank you for everything you do!
