Comments: Allowing logging/clearcutting in the Tongass, America's largest remaining rainforest, will destroy important habitat for salmon, bears and wolves, and worsen the climate crisis. This is unforgivable, particular in a time where we're seeing our forests and wildlife decimated by fire. As Randi Spivak, Public Lands Director at the Center for Biological Diversity, put it so perfectly: "Clearcutting the Tongass and wiping out enormous carbon stores is like cutting off part of the planet's oxygen supply. It's mind-boggling that the Trump administration wants to decimate this spectacular old-growth forest and erase one of the solutions to averting catastrophic climate change."

Please don't let this happen. ALL of our lives depend on better forest management decisions.
