Title:

Comments: Please protect the Tongas national forest. Our rainforest are the key to medical and ecological advancement and that could be ruined by deforestation. Our family believes in the untouched Alaska land that has been home to the Haida, Tlingit, and Tsimshian tribes. We have no right to destroy the wild wilderness that supports life in SE Alaska. As someone that grew up in Ketchikan and experienced the beauty of the Tongas, I fine the repeal of the roadless rule a senseless act of violence against all that live here. Protect our fish and wildlife from senseless distraction.
