Comments: Too much beautiful wilderness has been destroyed at the hands of humans, we cannot let Salmon River be the next. It is our duty to protect the wilderness for future generations and for ourselves. Because the earth does not only offer material things, it offers beauty and tranquility; we seem to want to raize it for our own personal gain. Many people visit the salmon river throughout the year and have priceless memories. It is not yours to take. Keep the Salmon River poison free and leave it be.
