Title:

Comments: To whom it may concern, It is urgent that the Tongass. National Forest be protected from the proposed plans to build roads and cut old- growth trees. It is a National treasure, being the largest intact temperate rainforest in the world!!! The Tongass Forest is filled with spawning salmon, grizzly bears, eagles and other magnificent creatures. It is filled with islands, salmon streams, and old-growth forests, granite cliffs that drop into deep fjords. The Tongass Forest is irreplaceable!. Our National Parks and Forest offer respite and rest and relaxation, peace and beauty. . Once old-growth trees are cut, they cannot be replaced. Then we lose a part of our history and take away the history of the Indigenous people who have lived in this area for hundreds of years. Please show respect and leave it alone, in its natural splendor .

Sincerely, Harvey and Cynthia Silver
