Title:
Comments: Please do not allow senseless mining to occur at the headwaters on the Salmon River. This river is magical, a special place as one of the last free-flowing rivers in the United States. There is a fragile ecosystem in this river, and mining activities would come at too great of a cost - polluting and destroying an incredible ecosystem that offers world class recreation and vital habitat. Do not allow these polluting activities to harm the Salmon River! Too much is at stake.
