Comments: We have precious few places left that are undeveloped. Mining companies have notoriously polluted all over Idaho & have been able to get out of cleaning up their activities. I feel that allowing another mining company so close to a gorgeous river that so many people use for recreating will destroy another place with tailings. Please do not allow another mine in a pristine place. I hike past old mines that are now in Wilderness areas & the amount of environmental degradation is extremely evident. A new mine in Idaho is not what we need right now. Especially next to such an amazing river. Lets not pollute more of our rivers and gorgeous places. Thanks.
