Comments: Hello there. What you guys plan to do just isn't right. Allowing a Canadian company to come in and destroy out water ways and ecosystem for their own gain is not ok. It doesn't matter where they are from, this will destroy our salmon habitat, leading to environmental degradation and ecosystem collapse. Our lands will be pumped full and nasty extraction chemicals which will seep into our ground water. Poisoning not only our fish and wildlife, but also out drinking waters. This space is protected land andn selling it off forna quick buck is not ok. As a tax paying citizen od the US, I DO NOT SUPPORT OR CONDONE THIS. I may not live here, but I've spent almost 2 decades while growing up camping in the surrounding area. This is a special place to me. Nature is sacred and should be treated as such. I would like for you to think of a special place you called your own as a child. Not to have control over, but a place you felt at home and in peace. What if your leaders decided it was more important to make money off of this space instead of preserving it. Would you not be frustrated? Please don't be so inconsiderate our the local community who depends on this space. Please dont poison our drinking water. Please do not destroy our environment. Gold isn't worth environmental destruction
