Comments: The water quality of the Salmon is more valuable than gold. Please consider the economic impact of tourism from people like myself who travel out of state to visit Idaho for its pristine whitewater. The wealth from the gold is a short term return, going to international corporations. When I visit Idaho, I support local businesses and the small town economy tourism industry. I am not interested in paddling a river next to a open pit gold mine, with a chemical dam draining into the river.

Please keep Idaho wild and beautiful.
