Comments: Thank you for taking my comment. I love Grand Targhee as does my family but I object to their proposed expansion. Encroachment into the Tetons has to stop somewhere and I think now is the time. Targhee is great the way it is, in fact I know many skiers from out of state who love to come to Targhee because it IS NOT a large ski resort like all the others. The #targheevibe is real lets keep it that way.

Habitat loss is a real concern as is the view from Teton Canyon. Do you really want to be camping in Teton Canyon and look up at ski lifts all summer? Plus, those south facing slopes are not good for skiing especially when you factor in how global warming will affect those slopes. It's no wonder that all the old ski resorts faced North...Alta, Vail, Snowbird to name a few...it's irresponsible to build ski areas on the South Facing slopes of Teton Canyon. I could continue but those are my major points. The forest service lands belong to all of us, not just a few elite's or people who can afford to ski a mega resort. Let's keep Targhee small, chill, and protect some land for future generations. Thank you.
