Comments: I am writing to voice my concerns with Targhee's proposed expansion. Please consider the amount of wilderness that is literally right next to south bowl and how the noise will impact wildlife; this is wintering ground for elk, deer, moose and sheep. In addition, the resort does not even have enough parking or road capability for the people that currently ski there. Our town does not need this expansion and it is irresponsible development into that is precious forest and nature. Also, by cutting trees and avalanche control in the proposed development it will increase the occurrence of avalanches in that area. I strongly am against letting the money hungry corporate Targhee have their way with what is one of my favorite areas of wilderness and wildlife. Please do not let us become an overdeveloped ski town that has sold its soul.
