Comments: I have a few questions regarding the lift installments and trail clearing.

- 1) What is the estimated time frame for all of the projects completion?
- 2) When Shoshone is replaced where will it go? Is it being sold to a nearby resort or used for another project?
- 3) What lift is projected to be installed first?
- 4) when will the peaked lift be installed?
- 5) The connector lift in the proposed south bowl expansion makes no sense, why wouldn't you just realign a single lift or if the slope doesn't permit it just make a angle station?
- 6) Regarding the summer season many trails already exist so much in fact the map is 90% covered with trails will more being built disruption to the mountain?
