Title:

Comments: Hi my name is Kim Little I am thrill with the history of stibnite and the Project work that Midas Gold have in mind of restoring this area with its habitation and the salmon can flow in clean water. I feel like this is a bipartisan decision,that the Idaho people will have more work to do due to job creation. furthermore,the rare Antimony that is found in this area which china is the world largest owner of this chemical element, we can have possible our own supply thanks to the vision of Midas Gold it will be a win,win situation for them and U.S.so I support Midas Gold as a future investor in their efforts at Stibnite Gold Project.
