Title:

Comments: The coaster would be a huge economic boost to the local (East Mountain) community. Once the coaster ride is finished then those riding the coaster would enjoy some local food at the base of the coaster. If accessible from the top side of the tram then it would also bring in revenue for the Tram and possibly the restaurant at the top of the tram. This is all contingent on the coaster not making an impact on the local wildlife along it's route (after completion). Do it, will be a blast and recognized nationally!
