Comments: Please dont approve or allow for motorized travel in the Wild Rapid River corridor; including all lands that contribute ecologically to the Wild Rapid River. There are plenty of other areas for motorized vehicle recreation, and many of these areas arent managed by users or land managers to protect vegetation, soils, water quality, cultural activities, or cultural resources. They abused not just used.

Excluding motorized vehicles will maintain the water quality, the native fisheries & riparian areas, opportunities for traditional cultural uses, and cultural resources should be protected.

Thanks for protecting this beautiful area by not allowing motorized vehicles.
