Comments: I am a resident of Edgewood, and gratefully have the Sandia's as my get away for fun and adventure. When I first heard about the mountain coaster potentially being built, I was so excited. I think this would be such a beneficial thing for our economy, and I also think It would be great to have another activity to do around the Albuquerque area. Unfortunately, our options for activities is slim. I got to ride one in South Lake Tahoe and it was an absolute blast, and worth every penny. I think this would get others to get out and explore our beautiful mountains, and spend quality time with their friends and familiae.
