Comments: My objection is the management of bison in the Custer Gallatin National Forest for decades to come. American bison should be a Species of Conservation Concern. The bison & their habitat need protection. Bison should be left to roam...not harassed, captured, quarantined, nor slaughtered. They are an American icon. The Forest Supervisor should adopt strong enforceable standards to benefit the buffalo & their habitat. As for other issues brought up in this comment period, please keep the wilderness as wild as possible. Mankind should keep manmade, noisy vehicles, guns, etc out of this wilderness. Thank you
