Comments: I think this project is a great idea. I think that it will draw more families out to CNF to recreate and explore their public lands. They won't only be enjoying more of what the ski area will have to offer, but they will also be exploring the local trails and campgrounds. It provides families and others a nice get away from the city, it also will bring people from other states and even other countries, which in turn will help to improve New Mexico's economy. Local businesses will also benefit financially from the extra visitors that are drawn in. The ski area is already established and I don't think it will make a huge environmental impact by adding the coaster. I hope you guys approve this project, because I think it would be a great improvement to our state. Ski Apache has zip lines and everyone loves having the ability to drive up to the ski area and having the choice to ride the zip lines or not. Even the tubing area is a huge hit in Ruidoso.
